PROFESSIONAL SUMMARY

Electrical and Computer Engineering student at the University of Thessaly with a focus on software development. I have a solid foundation in Python and have built 80+ projects including Flask web apps, data analysis tools and automation scripts.

EDUCATION

University of Thessaly | Expected 2028

Electrical and Computer Engineering at the University of Thessaly

Volos, Greece
Sept 2023

JOB EXPERIENCE

Agrobox | Software Developer | Volos, Greece | April 2026 - June 2026

- Enhanced a feature to automatically generate and export official agricultural registries (Excel/Word formats) for olive farms, adding missing support for municipal data.
- Sped up the app by adding caching to cut down on repeated API calls when fetching satellite images (NDVI, NDWI/NDMI).
- Built a mobile-friendly dark mode using color palettes provided by a designer, making sure it matched the existing light theme.

ADVANCED PROJECTS

Flight Tracker | Python, REST APIs, Google Sheets APIs

- Built an automated Python script that reads flight destinations and target prices directly from a user-provided Google Sheet via API.
- Programmed the application to monitor live flight data and automatically send email alerts whenever a flight is found below the target price.

Full-Stack Portfolio Website | Python, Flask, WTForms, Bootstrap

- Developed a responsive, full-stack website using the Flask framework to host and showcase my coding skills.
- Designed the front-end layout using HTML, CSS and Bootstrap so the site looks clean and works well on mobile phones.

Multi-User Blog Application | Python, HTML, CSS, Bootstrap, Authentication (Flask-Login), SQLAlchemy/SQLite

- Built a fully functional blog platform using Flask where users can register, log in, create posts, and leave comments.
- Implemented user authentication and security by hashing and salting passwords with Werkzeug, ensuring sensitive user data is stored safely in the database.
- Designed relational database structures using SQLAlchemy so that only the original author has permission to edit or delete their specific posts.

SKILLS

- **Programming Languages:** Python, Java, PHP, C/C++, SQL, HTML/CSS.
- **Web Development & Databases:** Flask, Django, Bootstrap, SQLAlchemy, SQLite, MariaDB, REST APIs, PostgreSQL
- **Data Science & Analysis:** Pandas, NumPy, Seaborn, Scikit-learn, Matplotlib, Matlab.
- **Version Control:** Git, GitHub.
- **Engineering Concepts:** Object-Oriented Programming, Data Structures, Operating Systems, Concurrency.
- **Languages:** Greek (Native), English (B2).
